

Michele Rampa

General practitioner & Clinical Researcher

I graduated in Medicine and Surgery from the University of Milan, Italy, in July 2007 (Medicine and Surgery). I am interested in the multidisciplinary research field of neuroscience.

In 2011 I won a scholarship from the University of Padua. I worked as a clinical researcher at the I.R.C.C.S. San Camillo Hospital Foundation of Venice, VE, Italy. I started studying the cognitive effects of dopamine replacement therapy in Parkinson's disease.

In the year 2016, I received an assignment at Compass Medical-Stewart Institute, Alzheimer's Center in Quincy, MA, USA, as a clinical trial assistant, evaluating patients and coordinating the study (sponsored by Lundbeck and Brackets Companies).

I returned to Italy in 2017 after living in Boston, MA, USA for five years to return to the Italian Academy.

I can work in a team and in a hectic environment, developing the right habits for better collaboration.
